Professional Summary

Aspiring Java Full Stack Developer with hands-on experience in Java, Spring Boot, React.js, SQL, and REST APIs through academic projects and internship experience. Passionate about building scalable web applications and continuously learning modern software technologies.

Education

- Vel Tech Rangarajan Dr. Sagunthala R D Institute of Science and Technology** 2022 – 2026
Bachelor of Technology (B.Tech) – Electronics and Communication Engineering
CGPA: 8.0

Skills

Languages: Java, JavaScript, SQL, HTML5, CSS3
Frameworks: Spring Boot, React.js, Node.js, Express.js
Databases: MySQL
Developer Tools: Git, GitHub, VS Code, Apache Tomcat, Antigravity
AI Technologies: Generative AI, Retrieval-Augmented Generation (RAG)
Concepts: REST APIs, OOP, JDBC, Servlets, CRUD Operations, Authentication

Internship Experience

Java Full Stack Intern — Magneq Software Present Hyderabad, India

- Developed and maintained Java Full Stack web application modules using Java, Spring Boot, React.js, and SQL.
- Developed RESTful APIs and integrated MySQL databases for backend functionality.
- Collaborated on React.js frontend development and integrated backend services using REST APIs.

Projects

- Drive RAG AI Agent**
 - Developed an AI-powered document assistant using Retrieval-Augmented Generation (RAG).
 - Integrated Google Drive API, PDF parsing, authentication, and Generative AI for intelligent document querying.
 - Designed a modular and scalable architecture for efficient document indexing and AI-powered query processing.
 - Technologies:** React.js, TypeScript, Node.js, Express.js, Tailwind CSS, Vite, RAG.
- Hospital Management System**
 - Developed a web-based Hospital Management System for patient registration and medical record management.
 - Implemented CRUD operations using Java Servlets, JDBC, and MySQL with deployment on Apache Tomcat.
 - Designed a modular backend architecture to simplify maintenance and support future feature enhancements.
 - Technologies:** Java, Servlets, JDBC, MySQL, Apache Tomcat.
- AI-Based Crop Monitoring System for Rural Environments**
 - Built an AI- and IoT-based crop monitoring system using ESP32, Arduino Nano, and IoT sensors.
 - Implemented TensorFlow/CNN-based crop disease detection with real-time monitoring through the Blynk IoT.
 - Integrated AI predictions with IoT-based monitoring for timely crop management.
 - Technologies:** Python, TensorFlow, ESP32, Arduino, Streamlit, LoRa.

Achievements & Certificates

- Presented research paper at IEEE IC2PCT-2026 International Conference conducted by Galgotias University.
- Participated in IEEE International Conference (2025) at RMK College.
- NPTEL Elite Certification – Sensors and Actuators (IISc Bangalore).
- Google Generative AI for Beginners.
