Objective

Aspiring Software Developer with knowledge in Java Full Stack Development and web technologies. Passionate about learning modern technologies, building efficient applications, and enhancing problem-solving skills while contributing to innovative software solutions.

Education

- Vel Tech Rangarajan Dr. Sagunthala R D Institute of Science and Technology** 2022 – 2026
Bachelor of Technology (B.Tech.), Electronics and Communication Engineering
CGPA: 8.0

Skills

Technical: Java, Core Java, Spring Boot, JavaScript, React.js, HTML5, CSS3, SQL
Soft Skills: Communication, Decision-Making, Leadership, Problem Solving
Tools: VS Code, GitHub, Adobe Photoshop

Internship Experience

Java Full Stack Intern — Magneq Software Present Hyderabad, India

Assisted in developing web application features using Java Full Stack technologies and supported frontend and backend development tasks. Worked with REST-based functionalities and basic database operations using SQL queries. Participated in debugging, UI improvements, and collaborative development activities to gain practical experience in real-time project workflows.

Projects

- AI-Based Crop Monitoring System for Rural Environments**
Developed an AI and IoT-based smart crop monitoring system for real-time monitoring of soil moisture, temperature, humidity, and crop health using ESP32, Arduino Nano, and IoT sensors. Implemented CNN/TensorFlow-based image processing for crop disease detection and integrated live monitoring with the Blynk IoT dashboard and cloud platform. Built the system using Python, Embedded C, Streamlit/Web Interface, LoRa communication modules, and wireless IoT data processing to support smart irrigation and sustainable farming.
- Drive AI Agent**
Developed an AI-powered document assistant that enables users to chat with uploaded documents using intelligent document retrieval and Generative AI integration. Built a full-stack web application with React.js, TypeScript, Node.js, and Express.js for real-time document analysis and AI-powered response generation. Implemented PDF parsing, authentication, and RAG-based context retrieval to improve document accessibility and interactive user experience. Tech Stack: React.js, TypeScript, Node.js, Express.js, Generative AI, RAG, PDF Parsing, Tailwind CSS, Vite, Google Drive API.

Achievements & Certificates

- Participated in IEEE International Conference (2025) at RMK College.
- Introduction to Generative AI Studio.
- Generative AI for Beginners.
- Fundamentals of Communication.
- Introduction to Android Studio Course.
